

Product Data Sheet

PS-00371, Rev. E
February 2010

Micro Motion® T-Series Coriolis Flow and Density Meters

Micro Motion® T-Series meters offer the best performance of any straight-tube Coriolis meter. The single straight-tube design is self-draining, and allows the meter to be cleaned or sterilized in place (CIP/SIP). The straight flow path also resists plugging, and can be pigged.

Superior flow measurement in a single straight tube flow meter

- Built-in balance bar provides the best single straight tube mass flow measurement to reduce variability in process control

Comprehensive hygienic application coverage

- Easy to CIP and SIP with EHEDG certified, 3-A authorized, ASME BPE design
- Diameter matches standard process tubing for draining in any orientation
- Fast product change-over with self-draining design and no profile effects
- Single flow path is easy to clean mechanically
- Highly-polished surface finish for ultra-pure fluids

Superior reliability

- No moving parts to wear or replace minimizes maintenance for long-term reliability

ELITE®
Peak performance Coriolis meter

ELITE HC
Peak performance high capacity meter

F-Series
High performance compact drainable Coriolis meter

H-Series
Hygienic compact drainable Coriolis meter

T-Series
Straight tube full-bore Coriolis meter

R-Series
General purpose flow-only Coriolis meter

LF-Series
Extreme low-flow Coriolis meter

Micro Motion T-Series straight-tube flow and density meters

Micro Motion Coriolis meters meet a vast range of application needs, ranging from extreme low-flow up to high-flow, high-capacity lines. Cryogenic, hygienic, high-temperature, and high-pressure— Micro Motion meters can handle them all. Micro Motion meters are available with a variety of wetted parts to ensure the best material compatibility.

Coriolis meters. Coriolis meters offer dramatic benefits over traditional volumetric measurement technologies. Coriolis meters:

- Deliver accurate and repeatable process data over a wide range of flow rates and process conditions.
- Provide direct inline measurement of mass flow and density, and also measure volume flow and temperature—all from a single device.
- Have no moving parts, so maintenance costs are minimal.
- Have no requirements for flow conditioning or straight pipe runs, so installation is simplified and less expensive.
- Provide advanced diagnostic tools for both the meter and the process.

T-Series Coriolis meters. Our straight-tube meter design is based on the ASME Bioprocessing Equipment Standard. With optional sanitary fittings, Micro Motion T-Series meters meet 3-A Sanitary Standards for Milk and Milk Products, are EHEDG clean-in-place approved, and feature a standard surface finish of 32 μ -inch Ra (0.8 μ -meter)—and 15 μ -inch Ra (0.4 μ -meter) is an available option.

The Micro Motion T-Series single straight-tube design makes these meters self-draining, and allows them to be cleaned or sterilized in place (CIP/SIP). The straight flow path also resists plugging, and can be pigged.

Flow performance

		Mass		Volume⁽¹⁾	
		lb/min	kg/h	gal/min	l/h
Maximum flow rate	T025	25	680	3	680
	T050	140	3800	17	3800
	T075	500	14,000	62	14,000
	T100	1100	30,000	132	30,000
	T150	3200	87,000	383	87,000
Mass flow accuracy⁽²⁾	$\pm 0.15\%$ of rate ⁽³⁾				
Volume flow accuracy⁽²⁾	$\pm 0.25\%$ of rate ⁽⁴⁾				
Gas flow accuracy⁽²⁾	$\pm 0.50\%$ of rate ⁽⁵⁾				
Repeatability	$\pm 0.05\%$ of rate				
		lb/min	kg/h	gal/min	l/h
Zero stability	T025	0.0038	0.10	0.0005	0.10
	T050	0.021	0.57	0.0025	0.57
	T075	0.075	2.0	0.009	2.0
	T100	0.165	4.50	0.02	4.50
	T150	0.48	13.0	0.06	13.0

(1) Specifications for volumetric flow rate are based on a process-fluid density of 1 g/cc (1000 kg/m³). For fluids with density other than 1 g/cc (1000 kg/m³), the volumetric flow rate equals the maximum mass flow rate divided by the fluid's density.

(2) Flow accuracy includes the combined effects of repeatability, linearity, and hysteresis. All specifications for liquids are based on reference conditions of water at 68 to 77 °F (20 to 25 °C) and 15 to 30 psig (1 to 2 bar), unless otherwise noted.

(3) When flow rate < (zero stability / 0.0015), then mass flow accuracy = $\pm[(\text{zero stability} / \text{flow rate}) \times 100]\%$ of rate and repeatability = $\pm[\frac{1}{2}(\text{zero stability} / \text{flow rate}) \times 100]\%$ of rate.

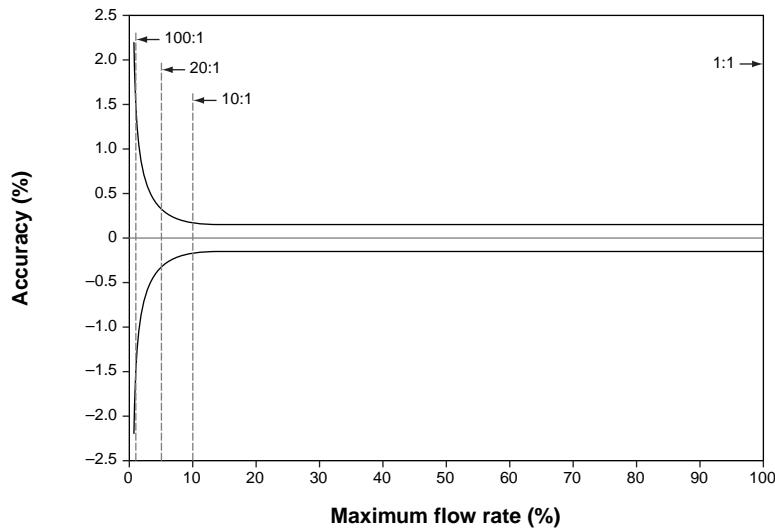

(4) When flow rate < (zero stability / 0.0025), then volume flow accuracy = $\pm[1.667 \times (\text{zero stability} / \text{flow rate}) \times 100]\%$ of rate, and repeatability = $\pm[\frac{1}{2}(\text{zero stability} / \text{flow rate}) \times 100]\%$ of rate.

(5) When flow rate < (zero stability / 0.005), then gas flow accuracy = $\pm[(\text{zero stability} / \text{flow rate}) \times 100]\%$ of rate, and repeatability = $\pm[\frac{1}{2}(\text{zero stability} / \text{flow rate}) \times 100]\%$ of rate.

Flow performance *continued*

Typical accuracy, turndown, and pressure drop

Pressure drop is dependent on process conditions. To determine accuracy, turndown, and pressure drop with your process variables, use Micro Motion's product selector, available at www.micromotion.com.

Turndown from maximum flow rate	100:1	20:1	10:1	1:1
Accuracy (\pm %)	1.60	0.31	0.15	0.15
Pressure drop psi bar	~0	0.06	0.22	14.3
	~0	0.02	0.05	0.99

Density performance (liquid only)

Accuracy⁽¹⁾ $\pm 0.002 \text{ g/cc}$ $\pm 2.0 \text{ kg/m}^3$

Repeatability $\pm 0.0005 \text{ g/cc}$ $\pm 0.5 \text{ kg/m}^3$

Range $0\text{--}5000 \text{ kg/m}^3$

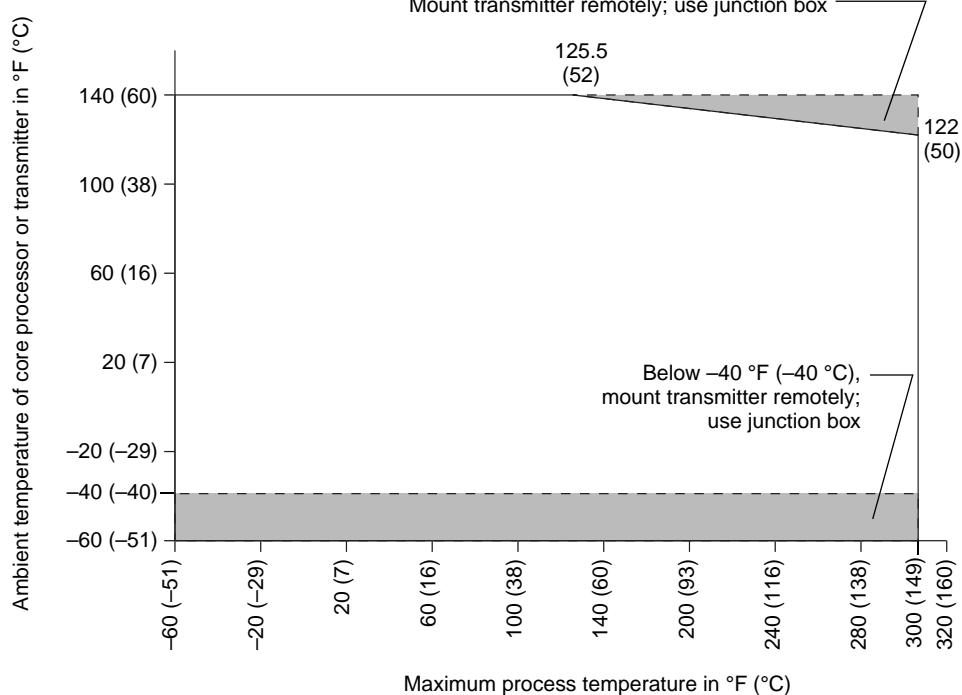

(1) Density accuracy includes the combined effects of repeatability, linearity, and hysteresis. All specifications for liquids are based on reference conditions of water at 68 to 77 °F (20 to 25 °C) and 15 to 30 psig (1 to 2 bar), unless otherwise noted.

Temperature specifications

Accuracy $\pm 1.0^{\circ}\text{C}$ $\pm 0.5\%$ of reading in $^{\circ}\text{C}$

Repeatability $\pm 0.2^{\circ}\text{C}$

Temperature limits⁽¹⁾⁽²⁾⁽³⁾

(1) Temperature limits may be further restricted by hazardous area approvals. See pages 7–8.

(2) When ambient temperature is below -40°F (-40°C), a core processor must be heated to bring its local ambient temperature to between -40°F (-40°C) and $+140^{\circ}\text{F}$ ($+60^{\circ}\text{C}$). Long-term storage of electronics at ambient temperatures below -40°F (-40°C) is not recommended.

(3) For the purposes of selecting electronics options, this graph should be used only as a general guide. If your process conditions are close to the gray areas, it may be inappropriate to use electronics options other than a junction box. Consult with your Micro Motion representative.

Pressure ratings

		psi	bar
Flow tube rating⁽¹⁾	All models	1450	100
ASME B31.3 secondary containment rating⁽²⁾	Models without purge fittings	1450	100
	Models with purge fittings	725	50
PED compliance	Sensors comply with council directive 97/23/EC of 29 May 1997 on Pressure Equipment.		

(1) Pressure ratings at 77 °F (25 °C), according to ASME B31.3.

(2) Housing is not rated for pressure containment below -20 °F (-29 °C).

Environmental effects

Process temperature effect	Process temperature effect is defined as the worst-case zero offset due to process fluid temperature change away from the zeroing temperature.
All models	0.002% of maximum flow rate per °C
Pressure effect	Pressure effect is defined as the change in sensor flow sensitivity due to process pressure change away from the calibration pressure. Pressure effect can be corrected.
All models	None

Vibration limits

Meets IEC 68.2.6, endurance sweep, 5 to 2000 Hz, 50 sweep cycles at 1.0 g

Sanitary standards

For sanitary applications, Micro Motion T-Series sensors with sanitary fittings feature a standard 32 μ -inch Ra (0.8 μ -meter) tube surface finish, with 15 μ -inch Ra (0.4 μ -meter) surface finish available as an option.

ASME	The Micro Motion T-Series sensor design is based on the ASME Bioprocessing Equipment Standard – 1997. With sanitary fittings, these sensors meet the ASME Bioprocessing Equipment Standard.
3-A	Micro Motion T-Series sensors with sanitary fittings meet 3-A Sanitary Standards for Milk and Dairy Products.
USDA	Micro Motion T-Series sensors with sanitary fittings are acceptable for use in dairy plants and are approved for USDA grading service.
EHEDG	Micro Motion T-Series sensors with sanitary fittings are approved by the European Hygienic Equipment Design Group. Sensors comply with the hygienic criteria of Machinery Directive 98/37/EC, annex 1 (additional essential health and safety requirements for certain categories of machinery), section 2.1 (agri-foodstuffs machinery). Test results show that Micro Motion T-Series sensors can be cleaned in place at least as well as the reference pipe.

Hazardous area classifications

UL and CSA

Sensors with junction box	Ambient temperature: +140 °F (+60 °C) maximum Class I, Div. 1, Groups C and D Class I, Div. 2, Groups A, B, C, and D Class II, Div.1, Groups E, F, and G
Sensors with integral core processor or transmitter	Ambient temperature: -40 to +140 °F (-40 to +60 °C) Class I, Div. 1, Groups C and D Class I, Div. 2, Groups A, B, C, and D Class II, Div.1, Groups E, F, and G

Hazardous area classifications *continued*

ATEX⁽¹⁾

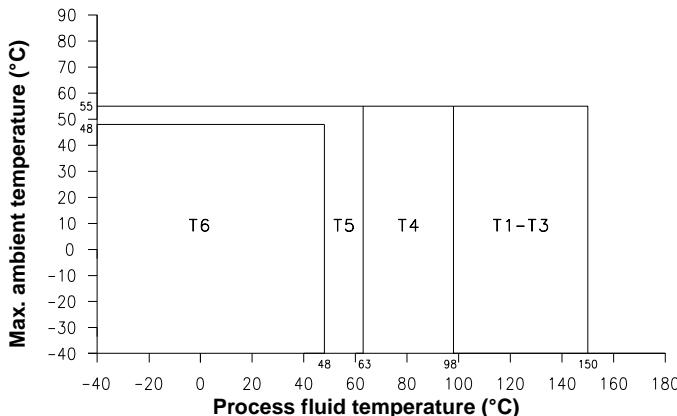

Sensors with junction box

Models T075 and T100

CE 0575 Ex II 2G EEx ib IIC T1-T6
II 2D IP65 T 182C – T 80C

Model T150

CE 0575 Ex II 2G EEx ib IIB T1-T6
II 2D IP65 T 182C – T 80C

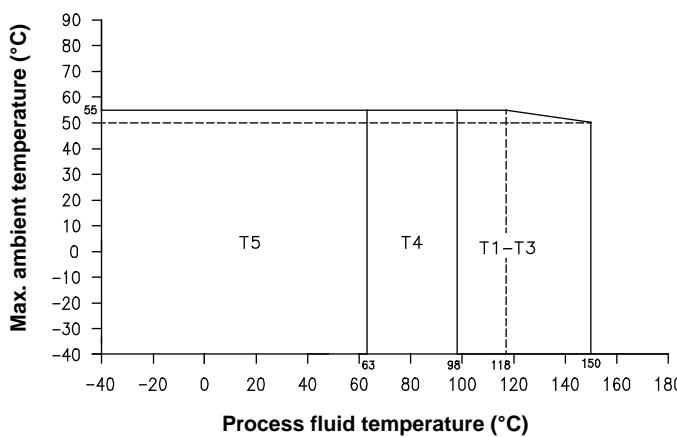

The maximum surface temperature for dust is as follows: T6:T 80°C, T5:T 95°C, T4:T 130°C, T3 to T1:T 182°C.

Sensors with integral core processor or transmitter⁽²⁾

Models T025, T050, T075, CE 0575 Ex II 2G EEx ib IIC T1-T5
and T100 II 2D IP65 T 182C – T 95C

Model T150

CE 0575 Ex II 2GD EEx ib IIB T1-T5
II 2D IP65 T 182C – T 95C

The maximum surface temperature for dust is as follows: T5:T 95°C, T4:T 130°C, T3 to T1:T 182°C.

(1) The ATEX "T" rating is defined as the maximum surface temperature of the flowmeter. The "T" rating and the ambient temperature restrict the maximum allowable temperature of the process fluid (shown in the graphs above).

(2) When the THUM wireless adapter is installed on the transmitter, the flowmeter marking is limited to T4, and the T4 lower boundary is changed to -40 °C.

Materials of construction

Wetted parts⁽¹⁾	Flow tubes Sanitary fittings ⁽²⁾ Socket-weld flanges ⁽²⁾	Titanium ASTM Grade 9 304L stainless steel and titanium ASTM Grade 1 F316/316L stainless steel and titanium ASTM Grade 5 (6AL-4V)
Sensor housing	Sensor Core processor Junction box	304L stainless steel 316L stainless steel or polyurethane-coated aluminum; NEMA 4X (IP65) Polyurethane-coated aluminum; NEMA 4X (IP65)

(1) General corrosion guides do not account for cyclical stress, and therefore should not be relied upon when choosing a wetted material for your Micro Motion sensor. Please refer to Micro Motion's corrosion guide for material compatibility information.

(2) Flanges are stainless steel; wetted parts are titanium. Only titanium is in contact with process flow.

Weight

Code	Case options
S	1450 psi (100 bar) containment
P ⁽¹⁾	Purge fittings (two 1/2-inch NPT female); 725 psi (50 bar) containment
Code	Electronics interface
Q	4-wire polyurethane-painted aluminum integral core processor for remotely mounted transmitter with MVD Technology
A	4-wire stainless steel integral core processor for remotely mounted transmitter with MVD Technology
V	4-wire polyurethane-painted aluminum integral core processor with extended mount for remotely mounted transmitter with MVD Technology
B	4-wire stainless steel integral core processor with extended mount for remotely mounted transmitter with MVD Technology
C	Integrally mounted Model 1700 or 2700 transmitter
R	9-wire polyurethane-painted junction box — not available with Models T025 or T050
H	9-wire polyurethane-painted junction box with extended mount — not available with Models T025 or T050
Code	Conduit connections
Electronics interface codes Q, A, V, and B	
B	1/2-inch NPT — no gland
E	M20 — no gland
F	Brass/nickel cable gland (cable diameter 0.335 to 0.394 inches [8.5 to 10 mm])
G	Stainless steel cable gland (cable diameter 0.335 to 0.394 inches [8.5 to 10 mm])
Electronics interface codes R and H (9-wire junction box)	
A	3/4-inch NPT — no gland
H	3/4-inch NPT with brass/nickel cable gland
J	3/4-inch NPT with stainless steel cable gland
Electronics interface code C (integrally mounted transmitter)	
A	No gland

Micro Motion—The undisputed leader in flow and density measurement

World-leading Micro Motion measurement solutions from Emerson Process Management deliver what you need most:

Technology leadership

Micro Motion introduced the first reliable Coriolis meter in 1977. Since that time, our ongoing product development has enabled us to provide the highest performing measurement devices available.

Product breadth

From compact, drainable process control to high flow rate fiscal transfer—look no further than Micro Motion for the widest range of measurement solutions.

Unparalleled value

Benefit from expert phone, field, and application service and support made possible by more than 600,000 meters installed worldwide and over 30 years of flow and density measurement experience.
